

Building A Learning Community

Dates: Thursdays, October 8th, 15th, & 22nd 2009

Time: 6:30 – 8:00 pm

Where: Walnut Grove Library

Dear Parents,

Research has shown that classrooms become rich learning environments when they share responsibility to achieve goals for the common good, and engage the diversity of the individual talents and the skills to do so. Please join us as we examine some of the research studies and effective practices that underlie the developmental, constructivist approach to reaching and teaching all children.

You will learn, first hand, about your child's classroom by engaging in interactive experiences supporting cognitive theory, human resilience, multiple intelligence, democratic classroom management, cooperative learning, constructivism, social-emotional learning, multicultural-gender equity, reflective practices, and authentic assessment. We look forward to seeing you for this exciting insightful event.

Sincerely,

Candace Aderman

Kat Peters
